Verni spreads its wings to Western Cape

VERNI SPECIALITY Construction Products has opened a regional office in the Western Cape to augment its head office in Gauteng and its regional office in Port Elizabeth.

Verni has taken over the business of the recently closed Industrial Flooring Systems (IFS) as well.

Verni managing director Vernon Botha says the acquisition of IFS will fill the gap in the market left by the demise of the company.

"Verni is both a manufacturer and applicator, which avoids the often encountered problem of split guarantees between supplier and applicator.

The company is now perfectly positioned to grow and consolidate the flooring market in the Western Cape."

In addition to its existing product range, which includes acid bricking, concrete repair and polyurethane and epoxy flooring, Verni has introduced a power-floated polymer modified screed which has proved to be extremely successful in the commercial property sector. Supaflo Poly PF screed is a highly resilient, decorative terrazzo-type floor finish with cured hardness of more than 80MPa.
